SUMMARY

Passionate Computer Science Engineering student with hands-on experience in AI agents, automation, and web technologies. Seeking internships and project-based roles to apply problem-solving and AI-driven solutions in real-world applications

PROJECTS

AI RESUME ANALYSER

Role: AI Engineer

Description: Built an AI-powered Resume Analyzer to evaluate resume quality, ATS compatibility, and job-role alignment using intelligent document parsing and NLP. Provided personalized, actionable feedback on keywords, formatting, and content to help candidates strengthen their applications.

Tech Stack: AI Agent, NLP, Resume Parsing, Machine Learning.

TELEGRAM CHATBOX

Role: AI Engineer

Description: Built a Telegram-based chatbot integrated with an AI Agent to automate responses, provide intelligent assistance, and perform user-defined tasks. Focused on natural language interaction and context-aware conversation flow.

Tech Stack: AI Agent

EDUCATION

Bachelor of Science in Computer Science

Velalar College of Engineering and Technology
CGPA: 6.9 | 2023 - 2027

Secondary School

Sree Saravana Niketan Matric Higher Secondary School
Percentage: 81.5% | 2022 - 2023

SKILLS

Languages: Python, Java, JavaScript, HTML, CSS

AI & GenAI: Generative AI, Agentic AI, Prompt Engineering, LangChain

Tools & Framework: Claude, Manus, OpenClaw, Turbotic, Omini, Github, PowerBI, Figma, Bootstrap

Automation & Integration: Zapier, Make, n8n

UI/UX Designing: Prototyping, Wireframing

Database: MySQL
